

Four Visitor Management System Case Study: 110 High Holborn

Helix Property Advisors Ltd are a specialist property and asset management firm, built on the philosophy of building solid landlord, tenant and client relationships, and seeking out the best services for each client. This philosophy lead Helix to select Accurro's four visitor management system in place of the costly paper sign in books.

With an average 2554 visitors each month, four visitor management has greatly reduced Helix's operating costs, boasting savings of 41% in the first year inclusive of all installation fees. The projected savings increase up to 56% for future years where there are no installation fees.

In addition to the cost savings, Helix and their tenants have benefited from GDPR compliance, tenant visitor notifications, auditing of their visitors anytime, anywhere, improved reception aesthetics with the removal of visitor books and with more features being constantly developed.

Four comparison with carbon copy visitor books purchased in bulk of 5000 passes a time. One iPad, Stand and Printer are purchased in the first year.
